ABOUT ME

Unity Developer with 6+ years of experience delivering both gameplay mechanics and core systems. Shipped multiple mobile titles (Google Play top-performers) and currently developing a co-op action game for Steam. Skilled in scalable architecture and live-ops systems (ads, analytics, localization). Known for reliable delivery and ability to turn complex ideas into polished features

SKILLS

- Core Technologies
 - C#
 - Unity
 - Asset Management
 - Debugging and Optimization
- Frameworks & Libraries
 - DI Frameworks (Zenject)
 - Firebase
 - Multiplayer (Unity Netcode, Unity Relay, Unity Lobby)
 - Mobile Monetization (Appsflyer, IronSource, Applovin)
- Development Tools
 - Tool development (Odin, Unity Editor)
 - Localization Plugins (Lean, L2, Unity)
 - Tweening Tools (DoTween)
 - Async development (UniTask)
 - User Interface (UGUI)
 - CI/CD Tools (Github Actions, Teamcity)
 - Version Control (Git flow, GitHub, BitBucket, GitLab)
 - AI Tools (ChatGPT, Github Copilot, JetBrains AI)

LANGUAGES

- English - Fluent
- Russian - Native

WORK EXPERIENCE

UNITY DEVELOPER | Personal Project | Remote | May 2025 - Now

- Developing a co-op action game for Steam (top-down, Overcooked-like) using Unity Netcode, Lobby, and Relay
- Implementing core gameplay systems (multiplayer synchronization, level mechanics, cooperative tasks)
- Planned Steam release as first commercial PC project

UNITY DEVELOPER | OneWayBlock | Remote | Sep 2024 - Now

- Improved a mid-core web multiplayer project by refining gameplay systems and UI responsiveness
- Built custom editor tools with Odin to streamline development workflows and reduce iteration time
- Collaborated with a distributed team to integrate new features without production downtime

UNITY DEVELOPER | Freelance | Remote | Jul 2024 - Sep 2024

- Ported multiple mobile apps (iOS/Android) to WebGL for VK and Yandex platforms
- Replaced ad/analytics SDKs with local providers to comply with regional requirements

UNITY DEVELOPER | Hitapps | Remote | Jun 2023 - Jan 2024

- Optimized a hyper-casual mobile game by implementing runtime server content delivery and robust save/load systems, improving retention
- Created custom editor tools to automate content validation and reduce manual QA effort
- Localized the game for multiple international markets, enabling wider audience reach

UNITY DEVELOPER | WannaPlay | Remote | Aug 2021 - Dec 2022

- Increased engagement by implementing tutorials, daily tasks, and IAP systems.
- Deployed Lean localization, making the product accessible to international players
- Led a large-scale UI refactor and project optimization, improving stability and performance

UNITY DEVELOPER | RedTower | Minsk | Apr 2020 - Jul 2021

- Led a team that released 5 successful Google Play and Appstore apps (casual & hyper-casual)
- Built reusable systems for ads, analytics, sound, and UI, cutting development time across projects.
- Implemented server-side content delivery with Addressables, enabling live updates without resubmission
- Integrated Firebase, Cinemachine, UniTask, and Zenject to enhance project scalability

UNITY DEVELOPER | Iridescent Studio, Ltd. | Minsk | May 2018 - Apr 2020

- Migrated casual games from Unity 5 (NGUI) to Unity 2017 (UGUI), improving maintainability and visual fidelity
- Developed features in mindfulness multimedia app with offline support
- Worked closely with backend engineers to deliver connected features
